Hydrogen Sulfide Training Standard Revisions

On June 30, 2017, ANSI Board of Standards Review approved ANSI/ASSE Z390.1-2017 Accepted Practices for Hydrogen Sulfide (H₂S) Training Programs. This newly approved standard includes revisions to ANSI/ASSE Z390.1-2006 (R2010).

There were many significant changes, additions, clarifications, and revisions to the 2017 version.

NIOSH Launches Mobile Lifting Calculator App

NIOSH recently launched a new mobile app called NLE Calc, which is designed to help workers avoid injuries that are typically caused by job-related manual lifting tasks. This application provides risk estimates to help evaluate lifting tasks and reduce the incidence of low back injuries in workers. The mobile app is available for both Apple and Android phones at their respective application stores.

WVU S&H Extension Offers Hydrogen Sulfide Trainer Course (OGTAC 300)

This trainer course will provide participants with the skills and knowledge to educate employers and employees on the hazards associated with H₂S. The course is designed for personnel interested in conducting Hydrogen Sulfide (H₂S) training for companies in the petroleum industry or those with H₂S present at their facilities. Special emphasis is placed on ANSI/ASSE Z390.1-2006, API Recommended Practice 49, API Recommended Practice 55, ANSI Z390.1 and OSHA 1910.134, 1910.1000 and 1910.1200. The course is designed to meet Hydrogen Sulfide Train the Trainer requirements of ANSI Z390.1.

The next class dates is November 8 & 9, 2017 in Morgantown WV.
