Safety Efforts Supporting Business Goals

As a member of the Safety Profession, it seems that many of us are always trying to get safety and health into the everyday operations of the business using OSHA Recordable Injury rates (lagging indicator) as the driver...

It is important to understand where leading indicators come from, how are they developed, how are they tracked, and how is the information used to make changes in real time instead of waiting until after an event occurs to react or waiting until the year-end to see how many injuries occurred.

Portable Electric Generator Safety

Portable electric generators are useful when temporary power is needed on jobsites as well as during storm clean-up, recovery efforts, and other power outages. There are many hazards associated with the use of a portable generator that may be overlooked or not considered when we use them however can have serious, if not fatal, consequences. The hazards include shock and electrocution, carbon monoxide poisoning, fire hazards, and excessive noise. These hazards can be eliminated or significantly controlled by...
