Presenter for an ISHN Webinar

"The Use of a Safety

Management System in the Oil
& Gas Industry and Beyond"***More information here!*****Interesting Review of a CSB Final Report**

On May 21, 2021, the U.S. Chemical Safety Board (CSB) released its final report and associated materials into the October 2019 hydrogen sulfide release at the Aghorn Operating waterflood station in Odessa, Texas. The reviewing of this incident report and associated items in the investigation file was enlightening to this Safety Professional as to the investigation process of the CSB. I found myself Monday-morning quarterbacking after watching the video and reading the final report wondering...**Read More!**

Weather Hazards (part 1 of 2)

Heat illnesses include heat stroke which is the most dangerous and also includes heat exhaustion, heat cramps, heat syncope, and heat rash. The basic message that OSHA has as part of their ongoing campaign is "Water, Rest, Shade" with more information being found...**Read More!**

**How Effective is Your Current Safety
Program?**

Take 2 minutes and answer 11 questions to assess the *results* of your current safety program. Based on your answers, you will receive a score of your current safety program and three recommendations for improvement!

Take the Assessment!**Ask RJR Safety Inc.**
