10:00am-2:00pm  
Location: TBD

### **"AI and the Safety Professional"**

(part 2 of 3)

So how is AI transforming occupational safety. Safety professionals tasked with protecting workers, ensuring compliance, and fostering a culture of safety, are increasingly turning to AI to enhance their capabilities. AI can be used by safety professionals to perform their duties more efficiently, proactively, and intelligently. From predictive analytics to real-time hazard detection, AI offers a suite of tools that can...

### **ASSP and Safety Trekr AI**

In July of this year, ASSP introduced a new AI tool called Safety Trekr AI™, a powerful AI search tool designed to deliver safety guidance from the trusted pages of the third edition of the Safety Professionals Handbook.

Using this tool, you can easily access the latest workplace safety research and practical applications from your mobile or desktop device. Some of the key benefits include finding answers to your safety questions while on a job site, you can format your output into a checklist to share with your team, you can turn that checklist into a quiz for your next Toolbox Talk, you can research...
