"AI and the Safety Professional"

(part 1 of 3)

Many Safety Professionals are in different stages of learning about AI and how it can be used in workplace safety. In this first part of a three-part article, we explore the basics of data and datasets from which AI compiles its information and then review the differences between open AI and closed AI, the systems not the company.

OSHA Renews NEP for Amputations in Manufacturing

EOSHA has renewed CPL 03-00-022, National Emphasis Program (NEP) on Amputations in Manufacturing Industries until June 30, 2025. This NEP targets industrial and manufacturing workplaces having machinery and equipment that can potentially cause amputations and seeks to identify and reduce or eliminate those hazards. Area offices are encouraged to continue to conduct unprogrammed inspections under this NEP as appropriate where complaints and/or referrals allege potential exposures to amputation hazards.

More information is available on the on the page and link below:
