## Combating the Heat in Industrial Environments:

### 6 Steps to Prevent Heat Stress

Industrial environments can be hot and humid, posing a significant threat to worker safety and health. Heat stress, a condition caused by the body's inability to cool itself effectively, can lead to debilitating and potentially life-threatening illnesses. Therefore, prioritizing heat stress prevention is paramount for any industrial operation.

This article outlines six key steps that industrial facilities can implement to create a safer and healthier work environment during hot weather. [Read More...](#)

## OSHA Updates Hazard Communication Standard

OSHA announced May 20, 2024, the final rule on the update the Hazard Communication Standard that includes improving the amount and quality of information on labels and safety data sheets and allow workers and first responders to react more quickly in an emergency. The updates take effect on July 19, 2024.

Aligned primarily with the seventh revision of the United Nations' Globally Harmonized System of Classification and Labelling of Chemicals, the updated standard will require labels on small packaging to be more comprehensive and readable and... [Read More...](#)
