How the EMR Directly Affects Your WC Insurance Premium?

The Experience Modification Rate (EMR), also known as the Experience Modifier or E-Mod, is an extremely important factor in workers' compensation insurance. The EMR is used to adjust an employer's premium based on their claim history compared to others in the same industry. Other factors are figured into the EMR to get the workers' compensation insurance premium.

The EMR is calculated by the insurance company looking at many factors. One of the major components is the employer's past claims history. This includes the frequency and severity of workers' compensation claims over a specific period, usually three years. The employer's claims history is compared to the industry average. If an employer has fewer or less severe claims than average...

OSHA Announces an Informal Public Hearing on the Emergency Response Proposed Rule

OSHA has announced that an informal public hearing on the Emergency Response proposed rule will begin on November 12, 2024, Federal Register: Emergency Response Standard. OSHA welcomes and encourages any interested members of the public to attend the hearing virtually. Links will be provided on before the hearing.

The proposed rule would replace OSHA's existing Fire Brigades standard, 29 CFR 1910.156, which was originally promulgated in 1980, covers only a subset of present-day emergency responders (firefighters) and has only had minor updates since it was published.

The focus of the Emergency Response proposed rule is...
